SUMMARY

A passion-fueled full stack web developer with over 20 years of expertise, with over decade of on-hand experience in online oriented businesses (luxury property investments, 5* resorts, digital goods).

As a results-oriented developer with a rare blend of creativity and technical skill, I have developed dozens of aesthetically pleasing web applications and resources from internal tools to client-facing solutions.

Whether working independently or within a team, I have a proven record of working efficiently in multilingual remote environments. To ensure maximum efficiency, I actively use version control systems, follow SOLID and clean code principles, prioritize best UI/UX practices.

Founder and developer of few non-commercial online projects (music streaming platform with 30k registered users and online media/platform about VR with around 15k followers), both with mobile apps listed.

WORK EXPERIENCE

Full Stack Web Developer

BRIC Group

09/2019 Spain/USA (Remote from Spain)

A company specializing in luxury properties investment in US/Brazil and development of a 5* resorts with 7 different offices across the world.

- Responsible for company's entire online presence, launching new corporate site and product web sites, server management and maintenance
- Developing unified internal marketing platform for efficient online campaigns, with dynamic generation of media-rich product landing pages.
- Developing client-facing solutions like private area and interactive property sitemaps, intranet web applications (property registry, online document management, performance and productivity analysis systems, campaign and asset management, human and inventory tools etc...
- Creating device-specific tablet app for in-office client signups, presentations and demo tools with deep integration to company's CRM systems
- Inventions and software I've developed significantly transformed the company's online presence and affected marketing strategy, leading to an expansion of market to new countries (from 2 to 6) and 20% increase in conversion rates and 35% increase in leads for online campaigns.

Web developer (Entwicklung)

SEM Vision GmbH

06/2013 - 08/2019 Germany (Remote from Spain)

Assigned to a small team of 3 developers dedicated to the MMOGA.com - a leading global distributor of digital goods with 3M+ average audience and six separate regional stores. During first 6 months we've totally reworked and relaunched a brand-new version of platform. Responsibilities:

- Customization and extending functionality for xtCommerce, implementation of fraud-detection system, smart ElasticSearch-based search
- Created custom modules and web applications from scratch, including an affiliate partner platform, services for content-creators (chats, online streaming overlays, donations, customer behavior analytics, business strategy analytics software, competitor price comparison system etc.

Web Developer / IT engineer

Moscow Media Group L.L.C.

2009 - 2013 Moscow (Hybrid)

A publishing house engaged in the full production cycle of around 40 newspapers, 5 glass magazines and range of online media resources.

- Engineering of an intranet system for interconnecting different departments. Significantly optimizing production workflows and reducing costs by automation of pre-preparation processes, improving planning and departmental communication using custom-designed web applications
- Developing authentic platform for direct B2B online sales with full integration to existing infrastructure (including billing, pre-processing etc)
- Engineering & monetization of unified content management system, transforming each publisher's online media to a separate revenue stream.

Web Developer

Istok Group OJSC

06/2007 - 12/2009 Moscow (Hybrid)

A large (3000+) joint-stock company producing and promoting wide range of leading alcoholic beverages (premium-class wines, champagnes etc)

- Development of new corporate website, introducing innovative "clean white" design concept complemented by smooth Flash animations
- Launching company's first online store for direct online sales to end-customers, with billing, delivery and order processing (innovation in 2009)
- Developing intranet applications for company's internal use and improving communications between different departments.

Freelance web developer / web designer

Silence Arts

2003 - 2009 Remote

Working with wide range of companies within different industries: from gambling to concerts, including huge clients like Nestle, PepsiCo...

- Development of web sites, online and offline presentations, interactive CDs, intros, multimedia, image/video post-processing etc.
